Since the International Space Station (ISS) re-supply ships (like Russia's Progress and Japan's H-II) have moved beyond the orbit of the Moon, and are instead headed towards a rendezvous with an ISS crewmember (called 'Earth Return' in the industry), there's been plenty of talk about whether or not the ISS astronauts will get to re-enter Earth's atmosphere and eventually splash down on a near-term ocean beach somewhere. We may know the answer by the end of this week. The first crew member to the ISS, Kazakhstan's Fyodor Yurchikhin will leave the station on Wednesday, and he'll be bringing with him a return capsule. This capsule holds the amount of air that would enable Yurchikhin to re-enter Earth's atmosphere, were he to depart now. Japan's HTV cargo craft, which arrived in the U.S. this week, carries a return capsule as well. Unfortunately for folks outside the U.S., HTV-8 is currently in storage, and won't be getting ready to start its return mission to Earth until the end of the month. However, once it does get packed up, HTV-8 will deliver some important cargo for the ISS astronauts returning home on Russia's Soyuz TMA-18M spacecraft. So what does this all mean? Well, if we ask Russian cosmonauts and cosmonaut trainers, they'll tell us that if a crewmember were to launch this week (at the

Fold Defy Download Links Microsoft still consider the Windows Phone 7 to be a niche product, and their apps are often neglected. However, there are quite a few nice apps that have been created for the platform, with the primary focus of these apps is to make the Windows Phone a bit more desktop-like, or use it on the go. For those looking for a new app that offers a touchscreen friendly experience on their Windows Phone 7 device, S-Image is definitely worth looking at. S-Image is a part of the S-App application suite, and after looking at the feature list, you would instantly think that the application is another snap-on app for the Windows Phone 7. However, unlike other apps within the suite, S-Image is meant to be installed alongside the main Windows Phone 7 on-screen keyboard, and once installed, it will be used in conjunction with it. S-Image can be thought of as a app that lets you scan (or copy and paste) text from an image. In other
