NovaNet-WEB Backup Download For PC

NovaBackup-Nova is a tool that can backup all your files, but only the Windows and SQL databases. It is a replacement of the older Backup utility. NovaBackup-1.0.0.2 INFO: Build version: 1.0.0.2, date: Apr. 2, 2011 Please be advised that there is a problem with the software when it attempts to create a restore point. Since we do not have a bug in the software, the best way to fix it is to close the program completely and re-open it. The problem is that when this happens you have to re-enter all the information in the program (server, user, password, etc.). This will fix it. This only occurs when you attempt to create a restore point and save the restore point information to the database. If you do not attempt to create a restore point and just manually make a backup of the backup folder, you will not encounter this problem. NovaBackup-1.0.0.0 INFO: Build version: 1.0.0.0, date: Feb. 22, 2011 NovaBackup-Nova allows you to backup your files, either online or locally. This program has a user-friendly interface and a wide variety of features. NovaBackup-Nova supports various backup methods such as ZIP, JAR, TAR, and RAR. You can also restore the backup to a different location. You can restore only a specific file or a specific folder. You can select various backup method and schedule options. You can select different options such as select only copied files. NovaBackup-Nova supports the following features: 1. Schedule option. 2. Automatic backup. 3. Create backup copy. 4. Restore the backup copy. 5. Copy the file. 6. Test file copying. 7. Create a scheduled backup and automatically run the backup. 8. Save backup to a ZIP, JAR, or TAR archive file. 9. Test the archive file copying. 10. Restore the backup to a different location. 11. Run the backup program in a remote session. NovaBackup-Nova 1.0.1.

What's New in the?
