The aim of the present work is to develop a selective LC-MS/MS method for the determination of pregnenolone, 17α-hydroxyprogesterone and cortisol in human plasma. The proposed method involved a one step protein precipitation using acetonitrile and supernatant separation using a newly designed polystyrene based monolithic stationary phase with a phenyl endcapped monomer after back flushing with non-polar solvent. The developed method was proven to be selective and sensitive with the limits of detection and quantification of 1.26 ng/ml and 3.75 ng/ml for pregnenolone, 1.21 ng/ml and 4.70 ng/ml for 17α-hydroxyprogesterone and 3.75 ng/ml and 10.31 ng/ml for cortisol. The method was validated with respect to linearity, precision, accuracy, specificity, matrix effect, stability, recovery and dilution integrity. The method was successfully applied to measure endogenous steroids in the plasma of healthy volunteers.Brain Death and End-Stage Liver Disease. ABERRATION TOWN Free [Mac/Win]

The Treasure Trove Gameplay Sands of Aura is a dungeon crawler. You walk around dungeons, collect treasure and weapons, fight tough enemies and level up. You can carry up to five weapons, but only one of them is currently equipped. Your weapon handle is your only piece of equipment, and you can combine it with different weapon types to create new weapons. There are four different weapon classes: Swords, Axes, Hammers and Bows. Swords are heavy weapons with a high damage.

Axes are longer, slower ranged weapons. Hammers are a bit faster and stronger than Swords. Bows are long-ranged and can be upgraded to a dual-wield mode. The game automatically attaches your weapon handle to the next weapon with which you combine. Combining a Sword and an Axes will typically result in a Sword + Axes combination. Combining an Axes with a Bow and a Bow with a Sword will result in a Bow + Axes combo. Some weapons, however, can be combined with other weapons to create unique weapon types. Combining a Sword and a Hammer, for example, will produce a sword + hammer combo, and combining two bows creates a bow + bow combo. Weapons are numbered and you are able to learn what they do in the form of scrap, which you can sell to a blacksmith. As you level up, you can buy better versions of certain weapons with scrap and gear. Gear comes in four levels: Level 1, Level 2, Level 3 and Level 4. Gear helps with your health, damage, attack speed and defense. Level 1 gear is useful for beginners. Level 2 gear can be used if you want better defense and damage. Level 3 gear is really nice if you want your defense to be a little better and your damage and health even better. You can only equip one of these types of gear at a time. Similar to Diablo, Sands of Aura makes the game a bit more challenging. Enemies level up as you progress through a dungeon. You can find secrets in dungeons, which are usually difficult puzzles or mini-dungeons. You can occasionally find treasure chests containing weapons and gear, as well as armor. There are a few other obstacles that can cause problems. Traps can help you get out of trouble temporarily. As you battle enemies, they drop currency. Your goal is to get to level 50 so you can begin to buy better weapons and armor. The game features a mix of randomly generated and hand-placed

& Shores of the Abyss "We're playing a joint single-session game of Secrets of New Orleans and a another one called Shores of the Abyss. Each of the scenarios has a different theme. It's kind of like a game of Mad Libs. The players get a sheet with the name of the place they're at and will start writing in titles to choose what's going on in the story." - Fantasy Grounds GM Kristin Klaasen "If you have found yourself lost in an old, abandoned Louisiana mansion and soon realize there is far more to worry about than the 'ghost' haunting the place, then try to escape your pursuer before his reach out and drag you away. Leave the doors to the garden wide open. Even the housecleaning staff is always gossipy, so release the poor punk from his eternal reserve." 20th Anniversary Edition Go behind the scenes of Fantasy Grounds The League is part of the CBC's DocZone community web server.
