particularly, to an analytical tool that facilitates the analysis and retrieval of information pertaining to a patient's medical history, drug, diet and/or other information. Many patients have a need to collect information pertaining to their personal health and medical history, including drugs that they are currently taking, past illnesses and medical conditions, whether they are currently being treated by a physician, family history, and the like. This information may provide an immediate warning of a possible medical condition, or may be used as a starting point for a doctor to inform a patient about a current medical condition. In addition to collecting such information, patients that have a medical condition
