You'll need a set of short little legs and a set of long long legs and a head. It is really quite simple, the more legs and the longer the legs the more control you have. If you try to sit down and try to land on your rear you will lose your balance and land on your head. You can also try to sit down on

your front legs and you will be fine but the body will fall over backwards and take out your front legs. You will then have to run around as a headless biped until you can
