23-03-2020 Alex I thought something was up because you said it was another PE and I still have Flash installed on my phone, the download didn't start and there are all kinds of problems with the VipersMods. I'm very sorry if you spent a lot of money on my things and my money doesn't solve your problems. I really didn't mean to insult you. I'm just really sorry. 23-03-2020 Alex I couldn't unzip the archive even when I logged in through TamTam's web server because it says the video is not a MP4 file. Well, I've deleted it and tried to install it again but it's still not working. I've tried everything with no luck. I'm really sorry, I should have been more careful. 23-03-2020 Oguz Re: Download Extra Folder with video and its name is: viperMOD PrimeTime v4.5.21 The oldest version of it which I've downloaded is 6.10.4.2.
