Power Audio Video DVD Converter is an audio/video converter that provides you with an easy-to-use interface that allows you to convert your audio and video files into different file formats, including WMV, AVI, MP3, WMA, 3GP, MOV, SWF, MPA, PSP, iPod, RA, VOB, ASF, 3GPP, AMR, AMR-WB, AAC, WAV, VOB, QT, FLV, WAV, M4A, MKA and more. It also allows you to rip CD tracks to MP3 and burn them to CD. It lets you choose which audio tracks and video clips you want to convert and even lets you edit the file names of the output files. With the powerful features offered by Power Audio Video DVD Converter, you can convert your entire collection of files from CD/DVD into different formats. You can change the audio and video settings as you desire. Plus, you can add audio tracks and video clips one by one or simultaneously. You can preview the output file in a small, built-in media player or copy it to disk. Additionally, you can increase the volume level of your files in the output folder before encoding. Power Audio Video DVD Converter Interface: 1. Select your audio and video tracks and then click the Convert button to start the conversion. You can select a directory and choose to change the output folder, as well as other settings and options. 2. On the main interface, click the Convert button to start the conversion. Then, you can select the destination folder you want to save the output files. 3. You can choose the output settings. These settings include the audio and video settings, input settings, audio data, video data, and output formats. You can also use the built-in audio and video players to preview the output file while the encoding is in process. 4. Click the Add button and choose the files you want to convert and open the file's destination folder. 5. The media file list shows all the media files in the selected folder. You can drag and drop them one by one into the queue box. When you drop the files, you will find them added to the queue. 6. Click the button to the right of the output format, set the output settings, start the conversion and save the output files in the destination folder. It is easy to convert multi-track audio and video files into MP3, WMA, VOB

What's New in the Power Audio Video DVD Converter?

Power Audio Video DVD Converter is a program designed to help you change audio tracks and video clips (e.g. 3GP, ASF, AVI, MOV, RM, WAV, MP3) into AVI, MP4, FLV, SWF, VOB, sound files and others. It can also prepare items for mobile devices. The interface of the tool is plain and simple to navigate through. Media files can be added to the file queue by using only the file browser because the "drag and drop" function is not supported. In the list you can find out the name, source format and size of each media file. If you do not want to change audio and video settings, then you can directly select the output destination and file type, in order to proceed with the encoding task. Otherwise, you can configure audio and video settings when it comes to the codec, bit rate, frame rate, size, aspect ratio, sample rate and number of channels. Plus, you can disable the audio stream. However, you cannot create output profiles or restore options to their initial values. Additionally, you can preview clips in a small, built-in media player, remove an item from the list and change the interface language. The video encoding app runs on a moderate-to-high amount of system resources, has a good response time and outputs a good image and sound quality. There were no difficulties during our tests. Power Audio Video DVD Converter did not freeze, crash or pop up errors. However, there is no "Preferences" area where you can set Power Audio Video DVD Converter to turn off the computer automatically or to open the output directory after the encoding procedure. Furthermore, you cannot trim clips. The interface requires some improvements. Power Audio Video DVD Converter Features: Audio/Video: change audio or video files to AVI, FLV, AVI formats, MP4, FLV formats, MP4, ASF formats, SWF formats, 3GP formats, MOV formats, MP3, WAV formats, AC3 formats, AAC formats, MP2, MP1, OGG, WMA, aiff, amr formats, etc. Video: change video files to AVI, MP4, FLV, SWF, VOB, AVI formats, MOV
