Q: Can you style a footer on WP7? Can you style a footer on WP7? I have the Css for header and body tags, but not footer. A: You cannot style the footer on WP7. It has no Height property, and you can't modify it. Edit: After discussing this on Twitter, it looks like there is some kind of CSS3 support for making the footer look like it's part of the page. Lithium and calcium in mental health. Lithium, because of its manifold beneficial actions on both neuronal and non-neuronal cells, is currently regarded as the treatment of choice for acute mania in bipolar disorder. Despite the physiological importance of lithium, one of the reasons why it has not been approved for the treatment of mood disorders as a standalone drug, is the fear of disabling neurotoxic effects, such as those seen after chronic treatment in animals. Calcium ions, on the other hand, have been demonstrated to play a critical role in a number of cell functions (from proliferation to differentiation and the control of transmembrane signaling and voltage-gated calcium channels), whereas lithium action is only in part reversible and preferentially affects membrane permeability, inducing, in particular, the inhibition of sodium-dependent inorganic phosphate transport. A therapeutic role for lithium can be envisaged, not only in mania, but also in cyclothymic disorders, possibly associated with the free Ca⁺⁺ ions overload, and in lithium-treated patients with psychotic depression. Future advances of lithium action, by the use of its derivatives, look promising.
