My Question: Could you show me how to find the time it takes to compute the following sum: $\sum_{i=1}^n a_i$ where each of the a_i 's can be any integer. The algorithm that they give in the lecture is : Create a set S containing integers $\{a_1, a_2, \dots, a_n\}$ For i from 1 to n Let C be the empty set. For j from 0 to i Add j elements of S to C . End-For End-For Return the number of elements in C . Shouldn't you add
