Category:Software performance Category:Windows software Category:Dispersion (computer security)Chew on this: Apple patent application scores more than 2,000 'yes' votes Apple has been granted a patent application for a system and method for restricting access to devices that store important or sensitive information. The best way to describe this system is like an electronic safe -- only in reverse. Or, perhaps, like a security access control system that works with a lock. Or, perhaps, like a lock with an RFID chip in the key -- ensuring that only authorized devices can open it. (GRAPHIC: A new approach to securing devices) The 5,770,642 application is an extension of earlier applications, including one filed July 20, 2010 that also describes a system and method for protecting devices. The first application is found at P0697811. The systems described in the new application involves a mobile device and a "security access control reader." The reader is used to read information stored in the device's electronic safe and determine whether or not a user is authorized to access
